PROFESSIONAL SUMMARY

Unity Game Developer with professional experience building and shipping cross-platform mobile games for Android and iOS. Experienced in gameplay system design, monetization integration (AdMob, Unity Ads, IAP), and production build optimization. Focused on performance-driven development, scalable architecture, and stable release pipelines.

PROFESSIONAL EXPERIENCE

Unity Game Developer

Rockit Game Studio - Lahore, Pakistan

February 2024 – Present

- Full-Time Unity Game Developer (September 2024 – Present)
- Designed and implemented core gameplay systems using C# and Unity
- Integrated AdMob, Unity Ads, and Unity IAP for Android & iOS
- Improved FPS performance by 20% on low-end Android devices
- Resolved Android Gradle and iOS build dependency issues
- Optimized memory management, reducing crashes and improving stability
- Delivered production-ready builds for Play Store and App Store
- Unity Game Developer Intern (February 2024 – August 2024)
- Assisted in gameplay feature implementation and UI systems
- Debugged and fixed runtime issues in Android builds
- Supported monetization integration and testing
- Participated in build preparation and store submission process

SELECTED PROJECTS

Cross-Platform Casual Game

Published under Rockit Game Studio (iOS & Android)

Available on App Store & Play Store

- Developed core gameplay systems and progression mechanics
- Integrated rewarded ads, interstitial ads, and in-app purchases
- Optimized performance for low-end Android devices
- Managed store submission pipeline (signing, provisioning, build configuration)

Casual Arcade Game – iOS

Published under Rockit Game Studio

- Designed gameplay loop and player progression systems
- Implemented Unity Ads and IAP monetization
- Handled App Store submission, certificates, and production builds
