PROFESSIONAL SUMMARY

Unity Game Developer with 2.5+ years of professional experience building production-ready mobile games for Android and iOS. Experienced across the Unity development lifecycle, including gameplay systems, progression mechanics, third-party SDK and monetization integration, debugging, testing, performance profiling, platform-specific build troubleshooting, and production build preparation. Comfortable taking ownership of features and complete Unity projects from implementation through stable production-ready builds. Improved FPS performance on low-end Android devices through profiling and optimization.

CORE: Unity • C# • Mobile Game Development • Gameplay Systems • SDK Integration • Ad Monetization • Android/iOS • Performance Optimization • Debugging • Testing • Production Builds

PROFESSIONAL EXPERIENCE

Unity Game Developer | Rokit Game Studio | Feb 2024 - Present

Lahore, Pakistan

- Develop and maintain production Unity mobile games for Android and iOS using C#.
- Design and implement gameplay systems, game mechanics, progression systems, and reusable game components.
- Integrate and maintain third-party monetization SDKs, including AdMob, Unity Ads, and Unity IAP.
- Improved FPS performance on low-end Android devices through profiling and runtime optimization.
- Diagnose and resolve Android Gradle, SDK dependency, Xcode, and iOS build issues; optimize memory usage and application stability.
- Prepare production-ready Android and iOS builds, including build configuration, signing/provisioning, dependency validation, and build testing.
- Work with existing Unity codebases and from-scratch projects to implement features, resolve bugs, test integrations, and deliver stable builds.

GAME DEVELOPMENT HIGHLIGHTS

Game Genre Experience: Sports • Simulation • Action • Casual / Arcade • Hyper Casual

- Contributed to mobile game projects across multiple genres, with portfolio entries documenting title-specific genre, platform, and project work.
- Built gameplay loops and progression systems; integrated rewarded/interstitial advertising and in-app purchases.
- Optimized projects for lower-end Android hardware and prepared stable production-ready Android/iOS builds.

TECHNICAL SKILLS

Engine & Language: Unity, C#

Gameplay: Gameplay systems, mechanics, progression systems, reusable components

SDKs & Monetization: AdMob, Unity Ads, Unity IAP

Platforms: Android, iOS

Build & Troubleshooting: Android SDK, Gradle, Xcode, signing/provisioning, dependency resolution, production builds

Performance & Quality: Performance profiling, memory optimization, debugging, testing, stability optimization

Tools: Visual Studio

EDUCATION & TRAINING

Intermediate in Computer Science (ICS) - Khan Bela

Full Stack Web Development - PNY Trainings – Arfa Software Technology Park
